

Trigonometry Project

This project will be completed in groups.

This project will count as a test grade.

Topic: This project should be completed with the idea in mind of reinforcing trig concepts and relationships which would allow a student to learn and/or study the concepts more easily. You must use one of the two following possible project types:

- Write an original song about trig and be prepared to sing it or have someone else sing it (lyrics must be submitted)
- Create a game (a board game, a card game, a computer game, etc) and all game pieces (instructions and all parts of the game must be submitted)

Assessment Point Breakdown

10 points	Trigonometric concepts covered – Trig is used accurately in presentation and a list of concepts covered is provided
5 points	Time Log – minimum of 4 hours required for 5 points
5 points	Creativity
10 points	Usefulness as a memory aid
5 points	Evaluation from other groups
5 points	Average of group members' productivity evaluations
10 points	Teacher evaluation points

Time Log

[illegible]
